

ISU Anti-Doping Program: Promoting Fair Sports and Protecting Athletes

Working in collaboration with the World Anti-Doping Agency (WADA), the ISU has developed since 1999 an extensive anti-doping program including in and out-of-competition urine and blood tests. Athlete Biological Passport (ABP) is also fully implemented in the ISU anti-doping program. In the 2013/14 season the ISU carried out nearly 2500 anti-doping tests, with WADA carrying out a further 250 out-of-competition tests on ISU athletes.

Specific anti-doping information for 2013/14:

ISU in-competition testing:

i) ISU Blood Screening pre-competition

Speed Skating:	802
Short Track Speed Skating:	562
Total:	1364

ii) Urine tests

Figure Skating:	208
Speed Skating:	318
Short Track Speed Skating:	137
Synchronized Skating:	9
Total:	672

iii) ABP Blood testing

Speed Skating:	70
Short Track Speed Skating:	41
Total:	111

iv) Blood Testing

5
3
8

ISU out-of-competition testing

i) Blood tests

Speed Skating	2
Short Track	1

ii) Urine tests

Figure Skating:	21
Speed Skating:	87
Short Track Speed Skating:	58
Total:	166

iii) ABP Blood testing

Speed Skating:	75
Short Track Speed Skating:	43
Total:	118

In the 2014/15 season, the ISU will increase its targeted out-of-competition testing based on competition results, blood tests and data from the ISU's longitudinal hematological database and Athlete Biological Passport.
